[HTML] Technology-mediated emergence of a competing logic in a mature field: The case of Bitcoin

S Kumar, D Slepniov, NG MacKenzie - Information and Organization, 2026

Emerging technologies, such as blockchain and artificial intelligence, are enabling new configurations of practices, roles, and meaning systems within mature fields that can disrupt institutionalized field arrangements and alter the centrality of institutional logics. Given the growing significance of this phenomenon, we aim to understand the constitutive role of technology's materiality in such processes. Through a historical processual analysis of Bitcoin, we propose a process model of disruptive institutional …

[HTML] Smart Contract-Driven Disaster Relief: A Case Study on QR-Integrated Blockchain Systems in the 2023 Kahramanmaraş Earthquake Recovery

G Caybasi, G Ayvazoglu, I Peker - International Journal of Disaster Risk Management, 2026

In the aftermath of the 2023 Kahramanmaraş earthquakes, this study examines how blockchain technology might be incorporated into humanitarian aid efforts, with a particular focus on an AFAD-supervised container city in Hatay. To promote accountability and transparency, the research field-tested a QR-integrated Ethereum-based prototype for food-package distribution on 9 April 2025. The technology created an immutable and independently verifiable record of documented …

BCFW: An Uncertainty-Aware Consensus Firewall for PoA Blockchains

Z Zhu, W Li - Mobile Networks and Applications, 2026

Existing security solutions often suffer from many practical issues in a blockchain environment such as generalization and actionability. This paper presents BCFW, a blockchain consensus firewall that couples uncertainty-aware intrusion detection with on-chain governance for Proof-of-Authority networks. We design an FT-Transformer tailored to tabular flow data and augment it with an aleatoric uncertainty head to make predictions actionable under operational risk. Validated on the CIC …

[PDF] Trustless Bitcoin Vaults

L Aumayr, X Dong, R Han, S Sridhar, D Tse, N Vanjani - Cryptology ePrint Archive, 2026

Bitcoin (BTC) is the largest crypto asset, yet the Bitcoin blockchain offers few applications in which BTC can be used. A standard approach to make BTC useful is bridging: BTC is deposited on the Bitcoin chain and a wrapped asset is minted on a chain such as Ethereum, where it can be used in smart contract applications. Unfortunately, all Bitcoin bridges to date require trust assumptions on a centralized party or a committee running the bridge to enable withdrawals of the deposited BTC …

Quantchaindoc:: Integrating Blockchain and Quantum Cryptography to Enhance Digital Document Security in Smart Cities

S Pandey, V Rishiwal, R Chaudhry, M Khari, M Yadav… - Transactions on Emerging …, 2026

Digital documents have been widely used on several domains and stored on digital platforms so that documents can be accessed from anywhere but unauthorized access to the digital documents may lead to fraudulent activities. Various frameworks

integrated with advanced technology and cryptographic techniques are proposed to enhance the security of digital documents. This paper proposes Blockchain Technology and Quantum Cryptography integrated framework Quantchaindoc to …

[PDF] Scalability, security, and moderation in decentralised systems

S Sokoto - 2026

The Internet remains decentralised at its core, with independently operated networks interconnected through open protocols. However, many of the services built on top of it have become concentrated among a small number of providers, from hosting and content delivery to social networking. This gives them control over content distribution, moderation, and data access. Decentralised systems offer an alternative. Historically, however, they have struggled to moderate abuse without a central …

[PDF] КОНЦЕПТУАЛІЗАЦІЯ КРИПТОВАЛЮТИ ЯК ІННОВАЦІЙНОГО МАРКЕТИНГОВОГО ПРОДУКТУ ТА КЛАСИФІКАЦІЯ БАР'ЄРІВ ЇЇ СПОЖИВЧОГО ПРИЙНЯТТЯ В …

С Зубець, М Тарасюк - Економіка та суспільство, 2026

Анотація Стаття присвячена концептуалізації криптовалюти як інноваційного маркетингового продукту та розробці класифікації бар'єрів її споживчого прийняття у B2C-сегменті роздрібних платежів. На основі багаторівневої моделі маркетингового продукту здійснено декомпозицію криптовалюти на родовий, реальний та розширений рівні цінності. Спираючись на модель довіри CRYPTOTRUST 2 та теорію дифузії інновацій Е. Роджерса, систематизовано …

Cropcare: A MultilingualAI–IoT Framework for Intelligent and Sustainable Precision Agriculture

N Susithra, K Subhana, KS Vishalkanth, V Tharun - 2026 International Conference on …, 2026

Agriculture faces challenges such as climate variability, inefficient irrigation, crop diseases, soil degradation, and limited access to intelligent farming support. This paper presents CROPCARE, an AI-driven smart farming framework that integrates Internet of Things (IoT), Machine Learning (ML), Deep Learning (DL), and cloud-assisted automation into a unified platform for sustainable precision agriculture. The system employs an ESP32-based sensing layer with soil moisture, temperature, and …

[PDF] A requirement-driven methodology for compatibility assessment in storage technology selection for agri-food traceability

F Scanu - 2026

The increasing demand for transparency, food safety, product authenticity, and regulatory compliance has fostered the adoption of traceability systems in the agri-food sector. Several storage technologies can support these systems, including conventional databases (relational and NoSQL) and DLT-based platforms such as permissionless and permissioned blockchains and DAG-based architectures. Although they support similar functional objectives, they differ substantially in non …

Analiza razpoloženja na kriptotrgu

M Brus - 2026

Diplomsko delo se osredotoča na razpoloženje vlagateljev na kriptotrgu, pri čemer je kot osrednji kazalnik uporabljen indeks strahu in pohlepa. Namen raziskave je bil ugotoviti, kako se razpoloženje na kriptotrgu spreminja skozi čas in ali so spremembe razpoloženja povezane s spremembami razpoloženja na delniškem

trgu. V teoretičnem delu smo predstavili kriptovalute, značilnosti kriptotrga, razpoloženje vlagateljev in načine merjenja sentimenta na finančnih trgih. V …
